

# **NFC TAG SETUP INSTRUCTIONS**

[www.vibeartztz.com](http://www.vibeartztz.com)

# STEP 1

## IPHONE

- NFC is enabled automatically on compatible models (no setting required)

## ANDROID

- Android
- Go to Settings
- Search for NFC
- Make sure NFC is ON

## STEP 2

### DOWNLOAD THE APP

- Open the App Store (iPhone) or Google Play Store (Android)
- Search for “NFC Tools”
- Download and install the app

## STEP 3

### OPEN NFC TOOLS

- Open the NFC Tools app
- You will see several tabs at the bottom

## STEP 4

.....

### WRITE WIFI NETWORK DETAILS TO THE TAG

- Tap the “Write” tab
- Tap “Add a record”
- Select “WiFi network
- Enter SSID and PASSWORD

**(note: Please ensure all entries are typed exactly as shown, as the system is case-sensitive)**

- Tap OK or Save

## STEP 5

### WRITE TO THE NFC TAG

- Tap “Write / Write tag”
- When prompted, place your phone flat against the NFC tag
- On most phones, the NFC reader is near the top back of the phone
- Hold still for a few seconds
- You will see a success message when done

## STEP 6

### TEST THE TAG

- Unlock your phone screen
- Tap the phone against the NFC tag
- A notification should appear
- Tap it to confirm to JOIN the network

## IMPORTANT TIPS

- Remove thick phone cases if the tag isn't detected
- Keep the phone steady while writing
- Only one phone should be near the tag during setup
- NFC tags can be rewritten unless locked

## HELP

---

- If the tag does not work:
- Restart your phone
- Re-enable NFC
- Try again slowly
- Make sure NFC Tools has permission to use NFC
